

Tank Z

CONSTRUCTION:

Containers are made with low-carbon steel and welded in cover of carbon dioxide and argon mixture. Receivers are made in few types that enable welding of pipes or joining of angle valve. Technology of production process ensures high level of internal purity. External surface is protected against corrosion with painting cover.

MOUNTING:

It is recommended to install containers in vertical position using M8 screw located on the bottom.

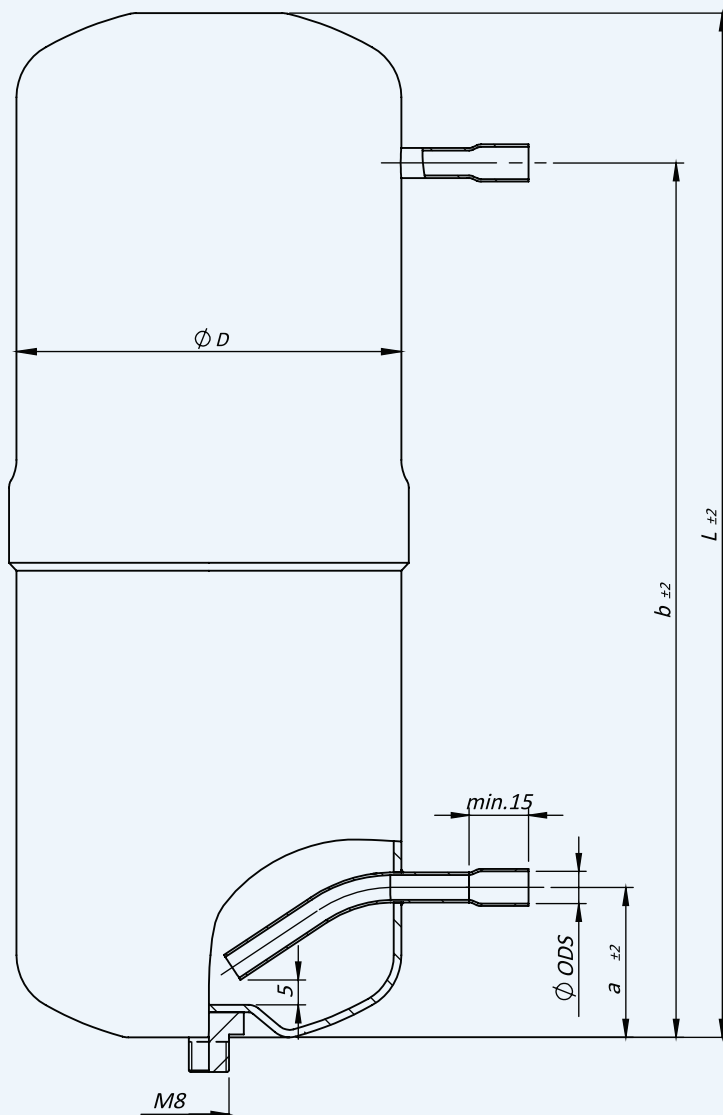

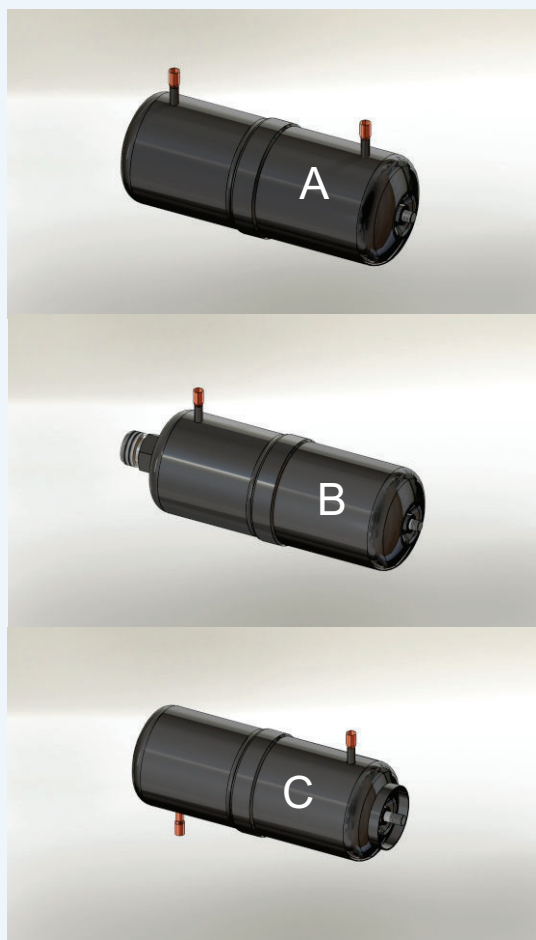

APPLICATION:

Z - type liquid containers are designed for compressing units working with CFC, HCFC and HFC agents. They enable gathering of liquid agent with condenser and constant intake of agent to expansion valve.

Refrigeration

 **Tank** for refrigeration
made according to directive
97/23/EC (PED)

Tank Z

There is a possibility to order the products, customized to the specific customer needs.

* variant without flange
